##Does Higgsfield AI Give Free Credits?

Yes, Higgsfield AI provides free access to selected features and generations. However, free generations and subscription credits are two different things.

Some models may offer free generations without deducting credits. Other models require credits to create images or videos. The available options depend on your account and selected plan.

The best way to check your free access is to sign in to Higgsfield and explore the generation panel. Before

creating anything, look at the credit cost displayed on the Generate button.

This helps you understand which models you can use with free access and which ones require credits.

##How Many Free Credits Do You Get on Higgsfield AI?

The number of free credits available depends on your account and subscription plan. Higgsfield's current plan information lists a free plan with limited access, while paid plans include specific monthly credit allowances.

It is important to understand that free generations are not always the same as free credits. Some plans provide a fixed number of free generations for selected models instead of adding credits to your balance.

For example, the official pricing page lists selected free generations for certain tools and models on eligible plans.

To check the latest details:

- *Visit the Higgsfield Pricing Page.*
- *Find the plan you want to explore.*
- *Check its Free Generations section.*
- *Review the models and generation limits.*
- *Sign in to confirm the options available to your account.*

This is the easiest way to find the current free generation limits.

For example, the official pricing information lists different monthly credit amounts for paid plans. The free plan provides limited access, while some paid plans include free generations for selected models.

You should check the pricing page before starting a project because the number of generations you can create depends on the model, resolution, and video duration.
