Does Higgsfield AI Give Free Credits?

Yes, Higgsfield AI provides free ways to explore its AI creation features. The exact credits and free generation options can depend on the current plan, account eligibility, and promotional offers.

New users should check their dashboard after registration to see what is available. Some offers may provide bonus credits, while other benefits may allow users to try selected models or features without using a regular paid credit balance.

Higgsfield AI also supports promotional campaigns from time to time. These campaigns may include bonus credits, subscription discounts, or temporary access to selected features.

To get the most from these opportunities, keep an eye on the official website, pricing page, and promotional announcements. Always check the offer details so you know how many credits you will receive and when they expire.

How Many Free Credits Do You Get on Higgsfield AI?

The number of free credits available on Higgsfield AI can change depending on the plan and current offers. There is no single fixed amount that applies to every user at all times.

Your available balance and generation options are shown in your account. The cost of creating a video or image can also vary based on the selected model, resolution, and video duration.

For example, a simple generation may use fewer credits than a longer video created with a more advanced model. Before starting a generation, check the credit cost displayed on the screen.

You can use this information to plan your creations and avoid spending credits on unnecessary experiments. Start with shorter videos, test your prompts, and move to more advanced settings when you are happy with the results.

Higgsfield AI may offer different credit benefits through its available plans and promotional campaigns. Some users may receive free generation opportunities, while eligible promotions may provide additional bonus credits.

However, you can still check your account regularly for free generation opportunities, promotional rewards, and other benefits. Some offers may be available only for a short time, so checking official updates can help you find new opportunities.

If your plan includes recurring credits, the account dashboard or subscription details will show the applicable renewal schedule. Keep in mind that subscription credits and promotional credits may follow different expiry rules.
