How to Get Free Unlimited Credits on Everygen (Viewmax Studio AI) in 2026: Get 10,000 Credits Now

If you are looking for a way to get **free credits on Everygen**, there is a special offer that can help eligible users claim **10,000 free credits**. Everygen, formerly known as Viewmax Studio AI, is an AI content creation platform that can be used to create videos, images, social media content, ads, UGC-style videos, and other AI-powered content.

Claim 10,000 Free Credits Now

The good news is that you do not necessarily need to start with an expensive subscription. A special promotional offer is currently available that gives eligible users a chance to claim **10,000 credits** and use them for AI content generation.

Claim 10,000 Free Credits

If you want to check the offer and see whether you are eligible, use the link below:

👉 **Claim 10,000 Free Credits Now**

The offer may be subject to eligibility or availability, so follow the instructions shown after opening the offer page.

What Is Everygen?

Everygen is an AI-powered content creation platform designed for people who want to generate content without having to manually create everything from scratch.

The platform can be used for different types of content, including:

- AI videos
- AI images
- Social media videos
- YouTube Shorts
- UGC-style content
- Marketing content
- AI advertisements
- AI avatars
- Voiceovers
- Captions

- Promotional videos

The platform was previously known as **Viewmax Studio AI**. If you searched for terms such as **Viewmax Studio AI free credits**, **Viewmax free credits**, or **Everygen free credits**, you may therefore see both names used online.

How to Get 10,000 Free Credits on Everygen

The easiest way to check the special 10,000-credit offer is to use the promotional page.

Step 1: Open the offer

Visit the special offer page:

Get 10,000 Free Credits

Step 2: Check your eligibility

Follow the instructions displayed on the page. Depending on the promotion, eligibility requirements may apply.

Step 3: Complete the required steps

If the offer asks you to create an account, log in, or complete another qualifying action, follow the instructions provided.

Step 4: Check your credits

After completing the required process, check your account to confirm that the promotional credits have been added.

Step 5: Start creating

Once the credits appear, you can use them for supported AI generation features available in your account.

Is the 10,000 Free Credit Offer Real?

The 10,000-credit promotion is presented as a special offer for eligible users.

Because promotional offers can have eligibility requirements, availability limits, or changing terms, you should always check the offer page before completing the claim.

The important thing is that you should **not pay anyone for a so-called credit generator** or use an unofficial tool that promises unlimited credits.

For the promotional offer discussed in this guide, start here:

👉 **Check the 10,000 Free Credits Offer**

How Do Everygen Credits Work?

Credits are used when you generate AI content. The number of credits required can vary depending on what you are creating.

For example, an AI video can consume a different number of credits depending on factors such as:

- AI model
- Video duration
- Resolution
- Audio generation
- Input requirements
- Generation settings

This means that 10,000 credits can provide significantly different amounts of content depending on how you use them.

If you are creating short social media videos, you may be able to generate considerably more content than someone producing long, high-resolution videos.

How to Make 10,000 Credits Last Longer

Getting 10,000 credits is useful, but using them efficiently is even more important.

Here are some practical ways to make your credits last longer.

1. Start With Short Videos

Do not immediately create long videos.

If you are testing a concept, start with a short generation. Once you are happy with the idea, create the longer version.

This can prevent you from wasting credits on videos that you do not actually want to use.

2. Test Your Prompt

Your prompt has a major impact on the result.

Instead of repeatedly generating videos with completely different prompts, improve your prompt gradually.

For example:

Weak prompt:

> *Make a video about a dog.*

Better prompt:

> *Create a cinematic 10-second video of a golden retriever running through a sunny park, realistic lighting, smooth camera movement, detailed fur, vertical social media format.*

A more detailed prompt can make it easier to get closer to your intended result.

3. Generate Small Tests First

Before creating a large project, test the concept.

This is especially useful when working with:

- Product advertisements
- UGC videos
- YouTube Shorts
- TikTok videos
- Instagram Reels
- Marketing campaigns

A small test can save credits that would otherwise be spent on a failed final generation.

4. Choose the Right AI Model

Different models can have different capabilities and credit requirements.

If you only need a simple social media video, you may not need the most expensive or resource-intensive generation option.

Choose the model according to the job rather than automatically selecting the most advanced option.

5. Avoid Unnecessary Regenerations

One of the fastest ways to consume credits is repeatedly regenerating the same content without changing your prompt.

Before clicking generate again, identify what was wrong with the previous result.

Then modify the prompt accordingly.

What Can You Create With 10,000 Credits?

The exact amount of content depends on the generation model and settings, but a large credit balance can be useful for experimenting with different content formats.

YouTube Shorts

You can use AI-generated videos as part of a Shorts workflow.

Ideas include:

- Story videos
- Educational Shorts
- Product videos
- Facts videos
- AI characters
- Explainer videos

TikTok Content

AI tools can help create short-form videos for TikTok.

You can experiment with:

- Hooks
- Product demonstrations
- Storytelling
- AI characters
- Visual effects
- Short advertisements

Instagram Reels

Everygen can also be useful for creating visual content for Instagram.

You can develop multiple versions of a Reel and test different concepts.

Marketing Videos

Businesses can use AI generation for:

- Product advertisements
- Promotional videos
- Social media campaigns
- Landing-page videos
- Brand content

UGC-Style Videos

AI-generated UGC-style content can be useful for testing different advertising concepts before investing in traditional production.

Free Everygen Credits vs Paid Credits

One reason users search for **Everygen free credits** is that AI video generation can become expensive when you are producing content regularly.

A promotional credit offer can therefore be useful for testing the platform before deciding whether you need a paid plan.

Feature	Promotional Credits	Paid Credits
Initial cost	May be free	Paid
Credit amount	Depends on promotion	Depends on plan
Eligibility	May apply	Depends on plan
Best for	Testing and experimenting	Regular production
Expiration	Check offer terms	Depends on credit type
Availability	Promotional	Generally available

Always check the current terms associated with your account.

How to Check Whether Your 10,000 Credits Were Added

After completing the promotional process, sign in to your account and look at your available credit balance.

If the credits do not immediately appear, check:

1. Your account dashboard
2. Your billing or credit section
3. Your email for confirmation
4. The promotion's instructions
5. Whether you completed every required step

If an offer has specific eligibility requirements, completing only part of the process may not activate the promotional credits.

Can You Get Unlimited Free Credits?

The phrase **"unlimited free credits"** can be misleading because AI generation always depends on the platform's current usage rules, promotional conditions, or fair-use policies.

A 10,000-credit promotion is different from literally having an unlimited credit balance.

However, **10,000 credits can provide a substantial amount of AI generation** for many users, especially when the credits are used carefully.

If your goal is simply to test Everygen without spending money immediately, the promotional offer is worth checking.

👉 **Check the 10,000 Free Credit Offer**

Is Everygen Free to Use?

Everygen can have both promotional/free access and paid options depending on the current account and plan structure.

A promotional credit offer can allow eligible users to try the platform without immediately purchasing a large credit package.

However, always check the current terms before signing up for any paid subscription.

Everygen Credits for YouTube Shorts

If you run a YouTube Shorts channel, 10,000 credits can be useful for testing a content workflow.

A simple process could look like this:

Idea → Script → Prompt → AI Generation → Edit → Captions → Publish

You can create several concepts first and determine which style works best for your audience.

For example, you could test:

- AI storytelling
- Motivational videos
- Educational content
- Product videos
- AI characters
- Short documentaries
- Facts and trivia

The best approach is to test multiple ideas rather than spending your entire credit balance on one large project.

Everygen Credits for TikTok and Instagram

Short-form content often requires a large number of creative experiments.

You can use your credits to test:

- Different hooks
- Different visual styles
- Different characters
- Different video lengths
- Different captions
- Different product concepts

Instead of making one perfect video immediately, create several small variations and compare their performance.

Are Everygen Credit Generators Safe?

You may find websites or videos claiming to offer:

- Free Everygen credit generators
- Unlimited credit hacks
- Free credit scripts
- Unlimited credit APKs
- Credit exploits
- Free account generators

You should be careful with these services.

A website asking for your password, API key, payment information, or browser session to "generate credits" should be treated as suspicious.

Never give your account credentials to an unknown credit generator.

A legitimate promotional offer should not require you to install suspicious software or reveal private account information.

Do You Need a Credit Generator?

No.

There is no reason to use a third-party "Everygen credit generator" when you can use an official account and a promotional offer.

Credit-generator websites can create security and privacy risks.

Instead, use the promotional route:

Claim the 10,000 Free Credits

Tips Before Using Your Free Credits

Before generating content, keep these tips in mind.

Save Your Best Prompts

When you create a prompt that produces a good result, save it.

You can then modify it for future projects.

Don't Waste Credits on Simple Tests

Use short or lower-cost tests when possible.

Plan Your Video Before Generating

Decide what you want the final video to look like before using credits.

Keep Your Prompts Specific

Mention:

- Subject
- Location
- Camera movement
- Lighting
- Style
- Duration
- Aspect ratio
- Mood

Review Before Regenerating

If something is wrong with a generation, identify the exact problem first.

Frequently Asked Questions

How can I get 10,000 free Everygen credits?

Eligible users can check the special promotional offer here: **claim 10,000 free Everygen credits**. Follow the instructions provided on the offer page.

Is the Everygen 10,000 credits offer free?

The promotion is designed to provide eligible users with 10,000 credits without requiring them to purchase those promotional credits. Eligibility and offer terms may apply.

Is Viewmax Studio AI now Everygen?

Yes. Viewmax has transitioned to the Everygen brand, so searches for Viewmax Studio AI and Everygen may refer to the same service during the transition.

Can I use Everygen credits for AI videos?

Yes. Credits can be used for supported AI generation features, including video generation. The amount consumed depends on the model and generation settings.

Can I use Everygen for YouTube?

Yes. AI-generated content can be used as part of a YouTube content workflow. You should still follow YouTube's current monetization and content policies.

Can I use Everygen for TikTok?

Yes. You can use AI-generated content to create short-form videos for TikTok and other social platforms.

Are Everygen credit generators safe?

You should avoid unknown websites claiming to generate unlimited credits. They may request sensitive information or attempt to install unwanted software.

How can I make my Everygen credits last longer?

Use short test generations, improve prompts before regenerating, select appropriate models, and avoid unnecessary retries.

Can I get unlimited Everygen credits for free?

Promotional credits and unlimited-use features are not the same thing. A 10,000-credit promotion provides a large credit balance, but actual usage depends on the platform's current rules and the type of generation you perform.

Final Thoughts

If you have been searching for **Everygen free credits**, **Viewmax Studio AI free credits**, or a way to get **10,000 free AI credits**, the special promotional offer provides an opportunity for eligible users to try the platform with a substantial credit balance.

You can use the credits for AI videos, social media content, UGC-style videos, advertisements, images, and other supported features.

The most important thing is to use the credits strategically. Test your ideas first, improve your prompts, avoid unnecessary regenerations, and choose the appropriate generation settings.
