Does Higgsfield AI Give Free Credits?

Yes, Higgsfield AI provides a Free plan with limited access and selected free generation opportunities. You can explore the platform and try supported tools before deciding whether you need a paid subscription.

However, free generations and account credits work differently.

- Free Generations: Certain eligible models allow you to create content without using your regular credits.
- Subscription Credits: Some plans include a specific number of credits for generating images and videos.
- Promotional Credits: Eligible promotional offers may add credits to your account.
- Unlimited Access: Selected models may offer Unlimited generation through supported plans.

Your available options depend on the model and plan. Before creating a video, check the generation panel to see whether the selected tool requires credits.

How Many Free Credits Do You Get on Higgsfield AI?

The number of credits available depends on the plan and offers associated with your account. Higgsfield does not use one fixed free-credit amount for every user.

The Free plan provides limited access to selected features. Paid subscriptions can include monthly credits and additional generation benefits.

You should also check whether a model offers free generations. These generations may be separate from your normal credit balance.

For the latest information, visit the Higgsfield Pricing Page and compare the available plans.

When comparing them, pay attention to:

- Monthly credit allowances.
- Models included in each plan.
- Free generation options.
- Unlimited model availability.

How Many Free Credits Does Higgsfield AI Give?

The available free credits and generation limits can vary depending on your subscription and current account benefits.

To find your current allowance, sign in and review your account information. You can then compare it with the benefits listed on the official pricing page.
