How Much Is a Galaxy on TikTok? Galaxy Gift Cost, Coins & Value Explained

Galaxy Gift · Cost & Value · 2026 | Updated October 28, 2026

If you have ever watched a TikTok LIVE and seen a large Galaxy animation appear on the screen, you may have wondered: **how much is a Galaxy on TikTok?**

The short answer is simple: a **TikTok Galaxy costs 1,000 TikTok Coins**. The amount of real money needed to buy those 1,000 Coins is not exactly the same for everyone, because TikTok Coin prices can vary by country, purchase method, Coin package, taxes, and other regional pricing factors.

As a general 2026 estimate, **1,000 TikTok Coins can cost around** $10–$**15 USD**, depending on where and how the Coins are purchased. Current third-party price trackers show this range rather than one universal dollar price.

So if you are searching for **how much is a TikTok Galaxy**, the most reliable number to remember is:

TikTok Galaxy = 1,000 Coins

The dollar, peso, ruble, yuan, or other currency equivalent can then be calculated from the current Coin price available in your region.

Quick Answer: How Much Is a Galaxy on TikTok?

A Galaxy on TikTok costs **1,000 Coins**.

The approximate real-money cost can vary, but current 2026 estimates generally place 1,000 Coins somewhere around $10–$**15 USD**. Some purchase methods can be cheaper or more expensive than others.

TikTok Galaxy Information | **Approximate Value**

Galaxy Gift | 1,000 Coins
Estimated USD value | $10–15
Estimated PHP value | Varies by current exchange/coin pricing
Estimated RUB value | Varies by current exchange/coin pricing
Estimated CNY value | Varies by current exchange/coin pricing
Gift type | Virtual TikTok Gift
Usually sent during | TikTok LIVE

The **1,000-Coin requirement** is the important part. The cash conversion should be considered an estimate because TikTok does not use one identical Coin price for every country and purchase channel.

What Is a Galaxy on TikTok?

A Galaxy is a virtual Gift that viewers can send to eligible TikTok creators. TikTok's Gift system allows viewers to purchase Coins and use those Coins to send virtual Gifts when the relevant feature is available.

Different Gifts have different Coin requirements. A small Gift may cost only a few Coins, while larger Gifts can require thousands or even tens of thousands of Coins.

The Galaxy sits in the higher-value portion of the Gift catalog and requires **1,000 Coins**. Current 2026 gift trackers also list the Galaxy at 1,000 Coins.

When someone sends a Galaxy during a LIVE, the creator and viewers can see the Gift animation on the stream.

This is why people often search:

* how much is a galaxy on tiktok
* how much is a galaxy worth on tiktok
* how much does a galaxy cost on tiktok
* how much is a tiktok galaxy
* how much is a galaxy gift on tiktok
* how much are 1,000 tiktok coins
* how much money is a galaxy on tiktok

All of these searches are essentially asking about the same basic question: **what does a 1,000-Coin Galaxy represent in real money?**

How Much Is a Galaxy on TikTok in 2026?

In 2026, the Galaxy is generally listed at **1,000 TikTok Coins**.

The real-money price of those Coins varies.

For example, current third-party trackers show estimates around $10.50 on some web-based pricing models, while other sources report 13–15 or more depending on the app, region and Coin package.

That means you should avoid thinking of the Galaxy as having one permanent price such as "$13."

A better way to understand it is:

Galaxy = 1,000 Coins → 1,000 Coins have a variable real-money cost.

This distinction is important because TikTok can change Coin pricing and the effective price per Coin can differ between purchase methods.

How Much Is a Galaxy Worth on TikTok?

The word **"worth"** can mean two different things.

Someone asking **"how much is a Galaxy worth on TikTok?"** might mean:

1. How much the viewer has to spend to send it.
2. How much the creator receives from it.

These are not necessarily the same amount.

Viewer Value

For the viewer, the Galaxy costs **1,000 Coins**.

The real-money amount required to obtain those Coins depends on the current Coin package and the user's region.

Creator Value

For the creator, the situation is different.

TikTok uses a virtual reward system involving Gifts and Diamonds. A creator's eventual reward should not automatically be assumed to equal the amount the viewer spent on Coins.

Some third-party trackers estimate the creator-side value at approximately half of the

viewer-side value, while other current sources show different effective payout estimates. TikTok's applicable reward rules and regional conditions should therefore be checked before treating any creator payout number as guaranteed.

So:

A Galaxy costs 1,000 Coins for the sender, but the creator does not necessarily receive the same cash amount the sender spent.

How Much Does a Galaxy Cost on TikTok?

A Galaxy costs **1,000 Coins**.

But how much does that cost in dollars?

That depends on how you purchase your Coins.

Current 2026 estimates show a fairly wide range. One current source estimates a 1,000-Coin Galaxy at approximately $10.60–15$ for the viewer, depending on the Coin price used.

Another current 2026 source lists approximately $10.50 for a web-based estimate and notes that app pricing can be higher.

Therefore, a useful general estimate is:

1,000 Coins ≈ $10–15$ USD

But your actual TikTok checkout price is the figure that matters.

How Much Is a Galaxy on TikTok in USD?

If you are specifically searching for **how much is a Galaxy on TikTok in USD**, the answer is approximately 10–**15** based on current 2026 estimates.

However, there is no need to assume that every TikTok user will see exactly the same price.

Your price can depend on:

* Country
* Currency
* Coin package
* Purchase channel
* App or web pricing
* Taxes
* Regional pricing
* TikTok's current Coin rates

For example, one current tracker lists a Galaxy at about $10.50, while another current source gives a broader 10–15 range.

That is why **1,000 Coins** is the most useful fixed answer.

TikTok Galaxy Price in Different Currencies

People search for the Galaxy price in many different currencies, especially when comparing TikTok Gift prices internationally.

The table below gives an **approximate currency conversion based on a** 10–**15 USD range**. These are illustrative currency conversions, not official TikTok prices.

Currency | **Approximate Value of** $10–$**15**

USD | $10–$15
Philippine Peso (PHP) | Approximately ₱580–₱870
Indian Rupee (INR) | Approximately ₹830–₹1,250
Russian Ruble (RUB) | Approximately ₽800–₽1,200
Chinese Yuan (CNY) | Approximately ¥70–¥105
Indonesian Rupiah (IDR) | Approximately Rp165,000–Rp250,000
Japanese Yen (JPY) | Approximately ¥1,500–¥2,250
British Pound (GBP) | Approximately £7.50–£11.25
Euro (EUR) | Approximately €8.50–€12.75
Brazilian Real (BRL) | Approximately R$50–$*R*75

Important: these are currency conversions for understanding the approximate USD range. They should **not** be interpreted as TikTok's official local Coin prices. TikTok's actual regional pricing may differ because Coin packages, taxes and purchase channels can change the final amount.

For the exact amount in your currency, check the Coin purchase screen associated with your TikTok account.

How Much Is a Galaxy Gift in Philippine Peso?

The question **"how much is a Galaxy gift in Philippine peso?"** is another way of asking for the PHP equivalent of a 1,000-Coin Galaxy.

Using the current general $10–15 estimate, the approximate converted value is around **₱580–₱870**.

However, this should not be treated as a guaranteed TikTok checkout price.

The actual Philippine price can differ because TikTok's Coin pricing is regional and can depend on the Coin package and purchase method.

If you are in the Philippines and want the exact current amount, open TikTok's Coin recharge section and check the current package prices in PHP.

How Much Is a Galaxy Gift in Indian Rupees?

For users searching **how much is a Galaxy on TikTok in India**, the same principle applies.

A 1,000-Coin Galaxy can be roughly equivalent to around **₹830–₹1,250** when converting the broad $10–15$ estimate into Indian rupees.

But this is only a currency conversion.

It does not mean TikTok necessarily charges exactly ₹830 or ₹1,250 for the Galaxy. Regional Coin pricing may produce a different final amount.

How Much Is a Galaxy Gift in Russian Ruble?

Using the same approximate $10–15$ USD range, the Galaxy could be roughly equivalent to ₽**800–₽1,200**.

Again, this is a conversion estimate rather than an official TikTok Russian pricing table.

The exact amount depends on the Coin price available to the account and whether Gifts and Coin purchases are supported in the relevant region.

How Much Is a Galaxy Gift in Chinese Yuan?

Using the same approximate USD range, 1,000 Coins could be roughly equivalent to **¥70–¥105**.

The actual TikTok Coin price can differ from a simple currency conversion, so users should check the current TikTok pricing available to their account.

Why Does the Price of a TikTok Galaxy Vary?

You may notice that different websites give different answers to **how much does a Galaxy cost on TikTok**.

There is a good reason for this.

Different Coin Packages

TikTok sells Coins in different packages.

The effective price per Coin can therefore vary depending on the package selected.

Different Purchase Channels

The price can also differ depending on whether Coins are purchased through the TikTok website or through an app-based purchase.

Current 2026 tracking sources report noticeable differences between web and mobile pricing in some markets.

Different Countries

TikTok's Coin pricing is not necessarily identical worldwide.

The same 1,000 Coins can therefore have different local-currency equivalents.

Taxes and Fees

Taxes and other applicable charges can also affect the final amount shown at checkout.

This is why articles that give one permanent Galaxy price can quickly become outdated.

How Many Coins Is a Galaxy on TikTok?

This is the easiest part of the answer.

A Galaxy costs 1,000 TikTok Coins.

If you already have 1,000 or more Coins in your balance and the Galaxy is available in the Gift panel, you have enough Coins to send one.

The important thing is to check the Gift panel before sending because TikTok can update its Gift catalog and pricing.

How to Buy TikTok Coins for a Galaxy

Before you can send a Galaxy, you need enough Coins.

The general process is:

1. Open TikTok.
2. Go to your profile.
3. Open the menu.

4. Go to your Balance or Coin section.
5. Select the option to purchase or recharge Coins.
6. Choose an available Coin package.
7. Complete the purchase.
8. Return to a TikTok LIVE where Gifts are available.

The exact menus can vary depending on the TikTok version, device and region.

Always use TikTok's official purchasing flow rather than third-party websites claiming to sell discounted or free Coins.

How to Send a Galaxy on TikTok

Once you have enough Coins, sending the Gift is straightforward.

Step 1: Join a TikTok LIVE

Open a LIVE stream where Gifts are enabled.

Step 2: Open the Gift Panel

Tap the Gift icon near the comment area.

Step 3: Find Galaxy

Look through the available Gifts for **Galaxy**.

Step 4: Check the Coin Requirement

Confirm that the Galaxy currently requires **1,000 Coins**.

Step 5: Send the Gift

Tap the Galaxy and confirm the transaction.

The corresponding Coins will be deducted from your balance.

Does a Galaxy Give the Creator $10–15?

Not necessarily.

This is one of the most important things to understand about TikTok Gifts.

If you spend $10–15 acquiring enough Coins to send a Galaxy, it does not automatically mean the creator receives $10–15.

The viewer purchases Coins.

The Coins are used to send a Gift.

The creator receives the applicable reward through TikTok's Gifts/Diamonds system.

Those are different stages of the transaction.

Current third-party sources provide different estimates for creator-side value, which is another reason not to present a single payout figure as an official guarantee.

How Much Does a Creator Make From a TikTok Galaxy?

There is no single creator payout number that should be treated as guaranteed for every account and every region.

Some current third-party sources estimate that a Galaxy can translate into roughly half of its viewer-side value, while other calculations produce substantially different figures depending on the assumed Coin and Diamond rates.

Therefore, if someone asks:

"How much money does a creator get from one Galaxy?"

The safest answer is:

The creator receives a reward through TikTok's virtual Gifts and Diamonds system, but the creator's payout is not necessarily equal to the viewer's Coin purchase price.

For an exact creator-side amount, the creator should refer to the reward information available inside their own TikTok account.

Is the Galaxy the Most Expensive TikTok Gift?

No.

The Galaxy is a relatively expensive Gift compared with simple Gifts such as the Rose, but TikTok has other Gifts that require considerably more Coins.

For example, current 2026 gift catalogs list high-value Gifts such as the Lion and various Universe Gifts at tens of thousands of Coins.

This means the Galaxy is not the most expensive Gift on TikTok.

Its **1,000-Coin price** places it well above everyday low-cost Gifts but below some of TikTok's largest virtual Gifts.

Galaxy vs. Other TikTok Gifts

Here is a simple comparison of commonly listed Coin values:

TikTok Gift | **Approximate Coins**

Rose | 1
Finger Heart | 5
Sunglasses | 199
Galaxy | 1,000
Whale Diving | 2,150
Concert | 3,000
Interstellar | 10,000
Lion | 29,999
Universe | 34,999+

Gift catalogs can change, so the current Gift panel should always be considered the final reference.

For the Galaxy specifically, current sources continue to list **1,000 Coins**.

Is a TikTok Galaxy Real Money?

A Galaxy itself is not cash.

It is a **virtual Gift**.

However, the Coins used to purchase that Gift are acquired using real money.

The basic system can therefore be represented as:

Real money → TikTok Coins → Galaxy Gift → Creator reward/Diamonds

This is why people often describe a Galaxy as having a real-money value even though the Galaxy itself is a virtual item.

Can You Get a Free TikTok Galaxy?

Be careful with websites or social-media accounts promising unlimited free TikTok Coins or free Galaxy Gifts.

A website asking for your TikTok username and password in exchange for free Coins should be treated with caution.

Never give your TikTok login credentials to an unknown service just because it claims that you can receive free Gifts.

If you want to send a Galaxy, use TikTok's official Coin purchasing and Gift system.

Why Do People Send Galaxy Gifts?

There are several reasons viewers send larger Gifts.

Supporting a Creator

Some viewers use Gifts as a way to financially support creators whose LIVE streams they enjoy.

Celebrating a Moment

A viewer may send a Galaxy after a creator reaches a milestone, wins a LIVE battle or completes a challenge.

Getting Attention in the LIVE

Larger Gifts usually create more noticeable animations, making them stand out in a busy LIVE chat.

Showing Appreciation

Some viewers simply use virtual Gifts as a way to say thank you.

The reason for sending a Gift varies from viewer to viewer.

How to Check the Exact Galaxy Price Yourself

Because TikTok's pricing can change, checking directly in the app is the most reliable way to determine the current amount.

Follow these steps:

1. Open TikTok.
2. Open your account balance or Coin purchase section.
3. Review the available Coin packages.
4. Calculate the effective price of 1,000 Coins.
5. Open a LIVE with Gifts enabled.
6. Select Galaxy.
7. Confirm the current Coin requirement before sending.

This gives you the price associated with your account and region instead of relying on an old third-party conversion.

Frequently Asked Questions

How much is a Galaxy on TikTok?

A TikTok Galaxy costs **1,000 Coins**. Its real-money value varies by country, Coin package and purchase method, but current 2026 estimates generally place 1,000 Coins around 10–**15 USD**.

How much is a Galaxy worth on TikTok?

A Galaxy is worth **1,000 TikTok Coins** to the viewer. Its creator-side reward is different and depends on TikTok's applicable Gifts and Diamonds system.

How much does a Galaxy cost on TikTok?

A Galaxy costs **1,000 Coins**. The actual cash price of those Coins varies by region and purchase method.

How much is a TikTok Galaxy in USD?

A 1,000-Coin Galaxy is commonly estimated at around 10–**15 USD** in 2026, although the exact amount can vary.

How much is a Galaxy gift in Philippine peso?

Using a general 10–15 USD estimate, a Galaxy is approximately **₱580–₱870** by currency conversion. The actual TikTok Coin price in PHP may differ.

How much is a Galaxy gift in Indian rupees?

Using the same general USD range, a Galaxy is approximately **₹830–₹1,250** by currency conversion. The actual regional TikTok price can be different.

How much is a Galaxy gift in Russian ruble?

Using the approximate 10–15 range, a Galaxy is roughly **₽800–₽1,200** by currency conversion. The exact TikTok price depends on regional Coin pricing.

How much is a Galaxy gift in Chinese yuan?

A 10–15 equivalent is approximately **¥70–¥105**, although this is a currency conversion rather than an official TikTok local price.

How many coins is a Galaxy on TikTok?

A Galaxy requires **1,000 TikTok Coins**.

How much is 1,000 TikTok Coins?

The value of 1,000 TikTok Coins varies by region and purchase method. Current 2026 estimates commonly put the viewer cost around 10–**15**, although some specific web or app packages can fall outside that range.

Does the creator get the full value of a Galaxy?

No. The amount a viewer spends on Coins is not automatically the same as the creator's final reward. TikTok uses its Gifts and Diamonds system for eligible creators.

Is Galaxy a TikTok LIVE Gift?

Yes. The Galaxy is associated with TikTok's virtual Gift system and is commonly sent during TikTok LIVE streams.

Is Galaxy the most expensive TikTok Gift?

No. TikTok has other Gifts requiring substantially more Coins, including high-value Lion and Universe-type Gifts.

Can the price of a TikTok Galaxy change?

The Galaxy's listed Coin requirement and the real-money price of Coins should be checked in TikTok because Gift catalogs, regional pricing and Coin packages can change.

Why do different websites show different Galaxy prices?
Because they may use different Coin prices, countries, exchange rates or purchase methods. Some calculate the Galaxy using web Coin pricing, while others use mobile-app pricing.

Is $13 the exact price of a TikTok Galaxy?
No. Saying that a Galaxy is exactly $13 everywhere is misleading. The Galaxy is **1,000 Coins**, while the cash price of those Coins can vary. Current 2026 sources show estimates ranging from roughly $10 to $15 or more depending on the pricing method.

Final Answer: How Much Is a Galaxy on TikTok?

So, **how much is a Galaxy on TikTok?**

The Galaxy requires **1,000 TikTok Coins**.

In real money, the value is not one fixed worldwide amount. Current 2026 estimates generally put the cost of 1,000 Coins at approximately 10–**15 USD**, although the actual price can vary according to country, Coin package, purchase channel and TikTok's current pricing.

The same 1,000-Coin Galaxy can therefore have different approximate values when converted into **Philippine pesos, Indian rupees, Russian rubles, Chinese yuan, euros, pounds and other currencies**.

The key number to remember is:

Galaxy = 1,000 TikTok Coins.

If you want the most accurate current price, check the Coin purchase screen and Gift panel on TikTok before sending it. That will reflect the pricing available to your account and region.
