Free 10,000 Credits on Everygen (Formerly Viewmax Studio AI): 9 Legit Methods

Looking for **free 10,000 credits on Everygen**? If you previously knew the platform as Viewmax Studio AI, you may be searching for terms such as **Viewmax Studio AI free credits**, **Everygen free credits**, **10,000 Everygen credits**, or **how to get free Everygen credits**.

Claim 10,000 Free Credits Now

There is a special promotional opportunity that can allow eligible users to claim **10,000 credits** and use them for AI-powered content creation.

If you want to check the offer first, use the link below:

👉 **Claim 10,000 Free Credits**

In addition to the special offer, there are several legitimate ways to reduce the amount you spend on AI generation and make your credits last longer.

What Is Everygen?

Everygen is an AI content creation platform that helps users produce different types of digital content.

The platform can be useful for creators, marketers, businesses, social media managers, and people experimenting with generative AI.

Depending on the available features, users can work with:

- AI video generation
- AI image generation
- Social media content
- UGC-style videos
- AI advertisements
- YouTube Shorts
- AI avatars
- Voiceovers
- Captions
- Marketing content

If you previously used or searched for **Viewmax Studio AI**, the name change can make it difficult to find the latest information. Viewmax transitioned to Everygen, so both search terms may appear in discussions about the platform.

How to Get 10,000 Free Credits on Everygen

The most direct method is to check the special promotional offer.

👉 **Get 10,000 Free Everygen Credits**

Open the offer page and follow the instructions displayed there. If you are eligible, complete the required steps and then check your account balance.

Promotional eligibility can vary, so always follow the current instructions shown during the claim process.

---

9 Legit Ways to Get or Save Everygen Credits

1. Claim the 10,000-Credit Promotional Offer

The first method is the most straightforward for users who qualify.

A special offer provides an opportunity to claim **10,000 credits**.

You can check it here:

👉 **Claim 10,000 Free Credits**

After opening the page, follow the instructions and check your account after completing the required process.

This is particularly useful if you want to experiment with Everygen before committing to a paid plan.

---

2. Look for New-User Promotions

AI platforms sometimes provide introductory benefits to new users.

When creating an account, look for:

- Welcome credits
- Trial credits
- Promotional bonuses
- Introductory offers
- Limited-time campaigns

The exact availability can change.

If you are already using the special 10,000-credit offer, check your account carefully to understand how the promotional balance is displayed.

---

3. Check Official Promotions

Promotional campaigns can sometimes provide additional value to users.

Keep an eye on official announcements and account notifications for:

- Bonus credits
- Limited-time offers
- New model promotions
- Special events
- Creator campaigns

Avoid relying on random social media posts promising "secret unlimited credits" unless the promotion can be verified.

---

4. Take Advantage of Model-Specific Allowances

Some AI services provide allowances or fair-use access for particular models or features.

This is different from receiving a traditional credit balance.

For example, a plan may provide a certain amount of usage for a particular model under specific conditions.

Therefore, before spending credits, check whether the feature you want to use already has an allowance associated with your account or plan.

---

5. Use Failed-Generation Refunds Correctly

AI generation can sometimes fail.

Depending on the service and generation type, failed or canceled tasks may be refunded automatically.

This is important because users sometimes assume every failed generation permanently consumes credits.

If a generation fails, check your account balance rather than immediately generating another version.

---

6. Use Shorter Videos for Testing

Video generation can consume credits quickly, especially when using longer durations or higher-quality settings.

A better workflow is:

Test → Review → Improve → Final Generate

For example, if you want to create a 30-second advertisement, first test your concept using a short generation.

Once you know that the concept works, move to the final version.

This approach can dramatically reduce unnecessary credit consumption.

---

7. Improve Your Prompt Before Regenerating

Suppose your first generation produces a character with the wrong clothing.

Do not simply press regenerate repeatedly.

Instead, modify the prompt.

For example:

> *Create a realistic young man wearing a black hoodie, standing inside a modern coffee shop, cinematic lighting, slow camera movement, vertical 9:16 video.*

Adding precise information can reduce the number of failed attempts.

---

8. Choose the Right Model and Settings

Different AI models can be designed for different tasks.

You may not need the most expensive model for every project.

Before generating, consider:

- Video quality
- Duration
- Resolution
- Audio
- Motion
- Image-to-video requirements
- Final platform

A simple social media clip may not require the same settings as a high-end advertising video.

---

9. Avoid Credit Hacks and Generators

This is one of the most important methods because it can protect your account.

Avoid websites claiming:

- Free unlimited Everygen credits
- Everygen credit generator
- Viewmax credit hack
- Unlimited credit APK
- Free credit scripts
- Unlimited account generators

These services may ask for your password, cookies, API credentials, or payment details.

You do not need them.

Use legitimate promotional opportunities and the platform's normal account system instead.

How Many Videos Can 10,000 Credits Create?

There is no single answer because credit consumption depends on the generation.

Factors can include:

Factor	Effect on Credits
AI model	Different models can have different costs
Video duration	Longer videos can require more credits
Resolution	Higher-quality output can cost more
Audio	Audio generation can affect usage
Input	Image/video input can affect generation
Settings	Different settings may have different costs

Therefore, 10,000 credits should not be treated as a fixed number of videos.

Instead, think of the credit balance as a budget that you can allocate across your projects.

Best Way to Use 10,000 Free Credits

If you receive 10,000 credits, do not spend them randomly.

Create a simple workflow.

Phase 1: Research

Decide what type of content you want to make.

Examples:

- YouTube Shorts
- TikTok videos
- Instagram Reels
- Product advertisements
- UGC videos
- Educational videos

Phase 2: Prompt Testing

Create short test generations.

Phase 3: Select Your Best Concept

Choose the concepts that produce the most useful results.

Phase 4: Create Final Videos

Use your credits for the final versions.

Phase 5: Repurpose

Turn successful ideas into multiple pieces of content.

Everygen Credits for Content Creators

Content creators can use AI generation to speed up the production process.

Instead of creating every visual manually, you can use AI to produce assets for:

- Shorts
- Reels
- TikTok
- Facebook videos
- Product demonstrations
- Storytelling
- Advertisements

The key is to treat AI as part of your production workflow rather than relying on one generation to create everything perfectly.

Everygen Credits for Businesses

Businesses can also experiment with AI-generated marketing content.

For example, a small business could create different versions of an advertisement and test:

- Different hooks
- Different characters
- Different backgrounds
- Different products
- Different calls to action
- Different video styles

This can make a large promotional credit balance useful for experimentation.

Can You Use Everygen Credits for Commercial Content?

Commercial use depends on the platform's current terms and the particular content/model being used.

Before using generated content for a paid advertising campaign or commercial project, check the current terms associated with your account.

Also remember that using AI-generated content does not automatically give you rights to third-party trademarks, copyrighted characters, music, logos, or other protected material.

How to Avoid Wasting Free Credits

Here are some simple rules.

Rule 1: Don't Start With the Final Video

Test first.

Rule 2: Write Better Prompts

A detailed prompt can reduce unnecessary iterations.

Rule 3: Keep a Prompt Library

Save successful prompts.

Rule 4: Don't Use Premium Settings for Everything

Use the settings appropriate for the project.

Rule 5: Check Your Balance

Keep track of your remaining credits.

Rule 6: Create Content in Batches

If you need multiple similar videos, plan them together.

Free Everygen Credits: What You Should Avoid

Some websites use keywords such as **free unlimited credits**, **10,000 free credits**, and **credit generator** to attract users.

Be careful if a website asks you to:

- Download an unknown program
- Install an APK
- Give your password
- Share an API key
- Disable browser security
- Provide payment information
- Install a browser extension from an unknown source

A legitimate promotional offer should not require you to compromise your account security.

Frequently Asked Questions

How do I get 10,000 free credits on Everygen?

You can check the special promotional offer here: **Get 10,000 free Everygen credits**. Follow the instructions on the offer page and check your account after completing the required steps.

Is Viewmax Studio AI the same as Everygen?

Everygen is the new name associated with the former Viewmax service. This is why users may see both "Viewmax Studio AI" and "Everygen" when searching for the platform.

Are the 10,000 credits really free?

The promotional offer is intended to provide eligible users with 10,000 promotional credits. Eligibility and any applicable conditions should be checked on the offer page.

Can I use the credits for AI video generation?

Yes, credits can be used for supported AI generation features. The amount consumed depends on the selected model and settings.

Can I get unlimited Everygen credits?

A 10,000-credit promotion should not be confused with unlimited usage. Your actual usage depends on the available credits, model costs, allowances, and applicable platform rules.

What is the safest way to get free Everygen credits?

Using legitimate promotional offers and official account features is safer than using third-party credit generators or hacks.

Can I use Everygen to make YouTube Shorts?

Yes. AI video generation can be used as part of a YouTube Shorts production workflow.

Can I use Everygen for TikTok videos?

Yes. The platform can be used to create short-form visual content suitable for social media workflows.

What happens if an AI generation fails?

Depending on the generation and platform rules, failed or canceled tasks may be refunded. Check your credit balance before submitting another generation.

How can I make 10,000 credits last longer?

Use short tests, improve prompts before regenerating, choose appropriate models, avoid unnecessary retries, and plan your content before generating.

Final Verdict

For anyone searching for **Everygen free credits**, **Viewmax Studio AI free credits**, or **10,000 free Everygen credits**, the special promotional offer provides a way for eligible users to access a large credit balance and experiment with AI content creation.

You can use the credits strategically for videos, images, social media content, UGC-style projects, advertisements, and other supported AI features.

The best approach is simple: **claim the promotional credits, test your ideas carefully, improve your prompts, and avoid wasting credits on repeated failed generations.**

👉 **Claim 10,000 Free Credits Now**

If you are planning to use Everygen for content creation, 10,000 credits can give you plenty of room to test different ideas before deciding how you want to build your long-term workflow.
