Free Higgsfield AI Credits: How to Get Free Credits and Explore Unlimited Access

Looking for free Higgsfield AI credits? Good news: there are real ways to try Higgsfield without paying for every image or video. You can start with the free plan and use official promo codes. You can watch for limited-time offers and earn credit rewards through the Higgsfield community. Credits let you explore supported AI tools, but the exact amount and the features you get depend on the offer that is live when you sign up.

✔✔ CLICK HERE TO GET 10000 FREE HIGGSFIELD AI CREDITS

We researched this guide using Higgsfield's official pricing page, help center, blog, and changelog in October 2026. We did not test any offer ourselves. Higgsfield changes its plans and promotions often, so always check the official pages before you decide.

Quick Answer: How to Get Free Higgsfield AI Credits

Here are the best ways to check for free credits and free access:

- **Create a free account.** You can generate on a small set of models for free. The free plan itself does not include credits.
- **Check the official pricing page.** It shows the current plans, any sign-up discounts, and limited-time deals.
- **Use an official promo code.** Codes can add bonus credits or a plan discount. You enter them in **Manage Account → Promocode**.
- **Follow Higgsfield's official channels.** Higgsfield says marketing promo codes appear first on its official social media. Discord community events are another source.
- **Earn community rewards.** Higgsfield gives credit rewards for some community milestones, like getting your work featured.
- **Watch for trials and campaigns.** Higgsfield has run time-limited offers, like a 24-hour free Unlimited trial for new users. These come and go.
- **Visit our access page.** Our guide page at [INSERT YOUR LANDING PAGE URL] collects offer details and steps in one place.

What Is Higgsfield AI?

Higgsfield AI calls itself an "AI-native creative suite." In simple words, it is a website where you can make AI images and videos in one place.

Higgsfield gives you access to many popular AI models. A "model" is the AI engine that creates your content. Its pricing page lists video models like Kling, Seedance, Google Veo, Wan, and Minimax Hailuo. It also lists image models like Nano Banana Pro, FLUX.2, Seedream, and GPT Image. Higgsfield also has its own tools, including Soul for images, Higgsfield Speak for talking videos, AI Influencer Studio, Ads Studio, and Genjutsu, which remixes one video into new versions.

With the Higgsfield AI video generator, you can:

- Turn a text prompt into a short video clip
- Turn a photo into a moving video
- Make talking-head and lip-sync videos
- Create product ads and social media clips
- Generate images in many styles, from fashion shoots to cinematic scenes

Creators like Higgsfield because they can try many top models without signing up for each one separately. It also has the free Higgsfield Academy, which teaches step by step how to make AI images and videos.

What Are Higgsfield AI Credits?

Credits are Higgsfield's in-app currency. Each time you make an image or video, it uses some credits.

Why do costs change? The Higgsfield AI credit system charges based on three things: the model, the resolution, and the length of the video. Higgsfield shows the exact cost on the **Generate** button before you confirm. Here are some examples from the official pricing page in October 2026:

- **Nano Banana Pro image:** 2 credits per image
- **Kling 3.0 video at 720p:** about 7 credits per 5 seconds
- **Seedance 2.0 video at 1080p:** about 60 credits per 5 seconds
- **Higgsfield Soul 2.0 image:** 0.12 credits per image

Higher quality and longer clips cost more. Re-rolls (trying again) and upscaling (making an image or video sharper) also use credits.

CLICK HERE TO GET 10000 FREE HIGGSFIELD AI CREDITS

Credits, subscriptions, and unlimited are not the same:

- **Credits** are a balance you spend, one generation at a time.
- **A subscription** is a paid monthly or yearly plan. It gives you a credit allowance, more models, and no watermark.
- **Unlimited access** means generations on certain models don't use credits for a set time. It covers only specific models, not everything.

Credit types and expiry (from Higgsfield's help center):

- **Subscription credits** reset each billing cycle and don't roll over.
- **Credit Pack and Auto-Refill credits** last 90 days from purchase.
- **Promo credits** expire on the date shown when you receive them.

If a generation fails, Higgsfield says credits are usually returned automatically within a few minutes.

How to Get Free Higgsfield AI Credits in 2026

This is the main part of the guide. Each method below is based on Higgsfield's official pages.

Check New Account Benefits

Start by creating a free account at **higgsfield.ai**. Then look around:

1. Sign up with your email or account login.
2. Check the top navigation bar. Higgsfield says your credit balance shows there.
3. Look for banners on the homepage and pricing page. In October 2026, Higgsfield showed a "Sign up and get your extra discount" banner to new visitors.
4. Open **Manage Account → Subscription** to see your plan and any active benefits.

New-user offers change often. Some give a discount instead of credits, so read each one carefully.

Explore Official Higgsfield AI Free Access

Higgsfield's help center says you can generate without a paid plan, but access is limited to a small set of models and doesn't include credits.

Here is what the Higgsfield AI free plan includes, based on the official pricing page and help center:

- Access to a small set of models (the pricing table marks Nano Banana Pro and FLUX.2 Pro as included for images)
- One generation at a time
- Up to one Character generation
- A visible Higgsfield watermark on every result
- No commercial use

This is a great way to learn the interface and test simple ideas. Note that the watermark stays on files made on the free plan, even if you upgrade later.

Check Higgsfield AI Promotional Offers

Higgsfield runs many promotions. Here is where to look:

- **The pricing page** at **higgsfield.ai/pricing** shows current deals and discounts.
- **The Higgsfield blog** explains new offers and how they work.
- **The changelog** (Creator Hub → What's new) lists launches and when offers end.
- **Exclusive Offers** are personal deals shown to active subscribers. Higgsfield says they vary from account to account and can't be requested.

Always read the fine print. Some deals are discounts on a paid plan, not free credits.

Look for a Valid Higgsfield AI Promo Code

Higgsfield officially supports promo codes. According to its help center, a promo code can give you a plan discount or bonus credits.

Where official codes come from:

- Higgsfield's official social media channels, where marketing promos are announced first
- The Higgsfield Discord community, where active members can receive codes during streams and events
- The Support team, which sometimes issues codes as compensation (these can't be requested)

How to check if a code is valid: Enter it in your account. If it works, Higgsfield shows what you got right away. Be careful with codes posted on random coupon sites. Many are old or fake. Only trust codes from Higgsfield's own channels.

Explore Community Rewards and Special Campaigns

Higgsfield's Community program is one of the most exciting official ways to earn credits. You earn rating points by building your creator profile and sharing work. Some milestones also come with credit rewards.

According to the help center, credit rewards are tied to actions like:

- Publishing a blog post approved by Higgsfield that gets 20 or more likes
- Getting your work featured by Higgsfield
- Reaching 100, 500, or 1,000 rating points

Credit rewards show up with a **Claim** button in the Ranking tab on your profile. Higgsfield says unclaimed rewards don't expire. The exact reward amounts are listed on the help page, and they may change.

What about referrals? Higgsfield ran a referral program that gave Unlimited Seedance 2.0 access, but its changelog says that program ended on July 16, 2026. Higgsfield also has an affiliate program, but it pays commission to creators. It does not give free credits.

Check Limited-Time Offers

Higgsfield sometimes runs big limited-time deals. For example, in July 2026, Higgsfield's blog announced a **1-day free trial of Unlimited** for new users. Here is how that offer worked:

- It was only for new users on the free plan.
- It gave 24 hours of Unlimited generation on 20+ models.
- It cost $0 to start, but a card was required.
- If not canceled, it turned into a paid monthly Plus plan.

Higgsfield's help center also says "there's no trial period" for plans. So trials are campaigns, not a permanent feature. Before you join any offer, check:

- Who can join (new users only?)
- When the offer ends
- Whether a card is needed

- What you will be charged after the offer ends
- How to cancel

Can You Get Higgsfield AI Unlimited Credits for Free?

This is a popular question, so here is a clear answer.

Higgsfield does not offer unlimited credits for free on an ongoing basis. But it does offer **Unlimited model access**, which is different and exciting in its own way.

How Unlimited works (from the help center):

- Unlimited applies to specific models only, not every model.
- It lasts for a set time. Many models come with 365 days of Unlimited, while new flagship models may have shorter windows, like 7 days.
- It comes with mid and top paid plans. You can also buy it separately in the Unlimited Models Marketplace.
- It works only while your subscription is active.
- It works only on **higgsfield.ai**, not through MCP, CLI, Canvas, or Supercomputer.
- Unlimited generations run in the standard queue, so speed can slow down at busy times.
- It is for personal use. Automation, scripts, and account sharing are not allowed.

The one time Unlimited was free was during special trials, like the 24-hour new-user trial described above. If you see one, it can be a fantastic way to test many models in a single day.

Three things to keep straight:

- **Free credits** – a small balance from promo codes or rewards, used one generation at a time
- **A paid subscription** – a monthly credit allowance with limits
- **Unlimited access** – no credit cost on certain models, for a set time, with a paid plan

Make your credits go further: Plan your prompt before you generate. Test ideas with cheaper models or lower resolutions first. Then make your final version in high quality.

How to Redeem a Higgsfield AI Promo Code

Higgsfield's help center gives these official steps:

1. Click your avatar and select **Manage Account**.
2. Open **Promocode** in the left sidebar.
3. Select **Enter code** and type in your code.

Higgsfield applies the promo instantly. The page then shows what you received, such as the discount or the number of credits added.

Important rules:

- Each code can be used only once, unless the promo says otherwise.

- Some codes are limited by time or number of uses.
- Support codes expire if not activated within 7 days.
- Promo credits expire on the date shown when they are added.
- If you cancel your subscription, promo credits stay available on the free plan's models until they expire.

If a code doesn't work, check for typos or extra spaces, and make sure it hasn't expired.

How to Use Higgsfield AI Credits

Here is a simple guide based on Higgsfield's "first generation" help page:

1. **Go to higgsfield.ai.** Always use the official website.
2. **Sign in or create an account.**
3. **Choose Image or Video** from the top navigation.
4. **Pick a model or feature.** Each section shows what is available to you.
5. **Enter a clear prompt.** You can also upload a reference image if the model supports it.
6. **Adjust settings** like duration, aspect ratio, or resolution.
7. **Check the credit cost** shown on the Generate button.
8. **Click Generate.** Your result appears in that section and in **Assets**.
9. **Check your balance** in the top bar. For a full history, open **Manage Account → Usage**.

If you have Unlimited access for a model, look for the **Unlimited** toggle in the generation panel. Turn it on so the generation doesn't use your credits.

Tips to Make Your Free Higgsfield AI Credits Last Longer

- **Write your prompt first.** A clear prompt gets better results in fewer tries.
- **Plan the shot.** Decide the subject, scene, style, lighting, and camera movement before you start.
- **Test small.** Try a short clip or a lower resolution before your final high-quality version.
- **Always check the cost.** Look at the Generate button before you click.
- **Avoid random re-rolls.** Change one thing at a time so you learn what works.
- **Save your best prompts.** Reuse them later to save time and credits.
- **Use budget-friendly models.** For example, Soul 2.0 images cost far fewer credits than many other image models.
- **Watch expiry dates.** Promo credits expire on the date shown, so use them in time.
- **Use the Higgsfield Academy.** Its free lessons can help you write better prompts from the start.

Free Credits vs. Paid Plans

FeatureFree Credits or Free AccessPaid Plan Starting cost$0 for the free plan; promo credits come from codes or rewardsPaid. October 2026 pricing page: Starter $19/month, Plus $47/month billed annually ($59 monthly), Ultra $99/month billed annually ($129 monthly)Available creditsFree plan: 0 credits. Promo and reward credits vary by offerStarter 270, Plus 1,200, Ultra 3,000 (with 6,000 and 9,000 options) credits per monthGeneration limits1 generation at a time; watermark; no commercial useUp to 2 videos at once on Starter; unlimited paid parallel generations on Plus and Ultra; no watermark; commercial use includedSupported toolsA small set of models (pricing table shows Nano Banana Pro and FLUX.2 Pro for images)Starter: selected models; Plus and Ultra: all models and features, plus Unlimited windows on selected modelsBest forTrying the interface and simple testsCreators who need regular, high-quality access

Plans, prices, and credit amounts change often. Higgsfield's own blog has shown different prices at different times, so treat the pricing page at **higgsfield.ai/pricing** as the final word. Prices there exclude VAT and local taxes.

How to Access the Higgsfield AI Offer Through Our Landing Page

Searching through blogs, help pages, and social posts can take time. That's why we made a simple Higgsfield AI access page.

Want to explore the available Higgsfield AI credit options? Visit our [Higgsfield AI access page]([INSERT YOUR LANDING PAGE URL]) to check the offer details and follow the instructions provided.

Please note: Our page is independently run. It is not an official Higgsfield website, and we cannot issue Higgsfield credits ourselves. Official credits, promo codes, plans, and trials come only from Higgsfield at **higgsfield.ai**. Always confirm the final terms on Higgsfield's official checkout and pricing pages before you pay.

Common Questions About Free Higgsfield AI Credits

1. How can I get free Higgsfield AI credits? Use official promo codes, earn community rewards, and watch for limited-time campaigns. The free plan lets you try some models, but it doesn't include credits.

2. Does Higgsfield AI offer free credits to new users? Not as a standard feature. New users get free access to a few models. Sign-up offers, like discounts or trials, appear from time to time.

3. Can I get unlimited Higgsfield AI credits for free? No ongoing free unlimited credits exist. Unlimited access to specific models comes with paid plans. It was briefly free during special new-user trials.

4. Is there a working Higgsfield AI promo code in 2026? Codes change often, so we don't list any. Check Higgsfield's official social media and Discord for current codes.

5. How many credits does Higgsfield AI provide? The free plan has 0 credits. In October 2026, paid plans ranged from 270 to 3,000 credits per month, with higher options on Ultra.

6. Can I use free credits for AI video generation? Promo credits on a free account work only on the free plan's models. Most video models need a paid plan.

7. Do Higgsfield AI credits expire? Yes. Subscription credits reset each cycle, packs last 90 days, and promo credits expire on the date shown.

8. How can I check my remaining credit balance? Look at the top navigation bar on **higgsfield.ai**, or open **Manage Account → Subscription**. Your full history is in **Manage Account → Usage**.

9. Are free Higgsfield AI offers available to everyone? Not always. Some are for new users only, some codes have use limits, and Exclusive Offers are personal to each account.

10. Where can I find the latest Higgsfield AI promotions? Check the official pricing page, blog, changelog, social media, and Discord.

Conclusion

The best ways to explore free Higgsfield AI credits are simple. Start with the free plan to learn the tools. Use official promo codes in **Manage Account → Promocode**. Grow your community profile to unlock credit rewards. And keep an eye out for exciting limited-time campaigns, like free Unlimited trials.

Remember that credits, subscriptions, and Unlimited access each work differently. Check the cost before every generation, and read each offer's rules before you join. When you're ready to find out more, visit our [Higgsfield AI access page]([INSERT YOUR LANDING PAGE URL]) and start creating.
