How Much Is a TikTok Rose Worth in Real Money?

If you are searching for how much a TikTok Rose is worth, the simplest answer is that it costs 1 coin.

However, TikTok Coins are purchased in packages, and the price per coin is not identical everywhere.

For example, if the estimated cost of one coin is around $0.0106–0.015$, one Rose would cost approximately one to two cents.

The actual amount can vary based on:

* Your country or region

Therefore, a Rose does not have one fixed worldwide cash price.

How Much Does a Creator Get From One Rose on TikTok?

One of the most common questions is whether TikTok creators receive the full amount viewers spend on gifts.

The answer is no. The viewer's spending and the creator's reward are different.

TikTok uses a virtual gifting and reward system. Gifts may contribute toward creator rewards represented through Diamonds, subject to TikTok's applicable policies and eligibility requirements.

For illustration, some third-party calculators use an estimated value of around $0.005 per Diamond. Under that model, a creator's estimated value from one Rose could be approximately half a cent.

However, this is not a guaranteed payout. The actual reward and withdrawal amount depend on TikTok's current rules.

How Much Does a Creator Make From 100 Roses?

If 100 Roses are sent, the viewer spends 100 coins.

Using the illustrative $0.005-per-Diamond model, the creator value could be around $0.50, but actual rewards may vary.

Roses Received | **Viewer Coins Spent** | **Illustrative Creator Value**

1 | 1 | Around $0.005
10 | 10 | Around $0.05
50 | 50 | Around $0.25

100 | 100 | Around $0.50

500 | 500 | Around $2.50

1,000 | 1,000 | Around $5.00

These are simplified estimates, not official TikTok payout guarantees.
